

“The Kingfisher is a bird that gets its name because it truly is a kind among the fish catching birds. In catching fish it sits on a limb of a tree that hangs over a stream. Looking into the water beneath. Then, as it sights a fish, it drops like a stone into the water. Seconds later it pops up with the fish in its bill. In addition to fish, it eats worms, crabs and selfish. It is found mostly near the fresh water streams of Europe and North America. The Kingfisher’s cry is shrill and piercing. The Kingfisher’s cry is shrill and piercing. The North American Kingfisher, called the belted kingfisher, because of a belt of blue feathers across its white breast, is larger than the European variety. The European kingfisher is a beautiful bird. Its feathers are bright blue, orange, deep red, pink and green.”
